

KAISER PERMANENTE'S COMMITMENT TO FRESNO

Building Healthy Communities Is Our Mission

Kaiser Permanente's work in the community uniquely combines investments from our health plan as well as our hospitals and often includes medical expertise, health research, clinical programs, and volunteers.

Priority Health Needs

Improve Access to Care - Provide programs for low-income and uninsured people.

Increase Healthy Eating and Active Living - Invest in strategies that give families and youth better access to fresh fruits and vegetables and safe places to play.

Improve Diabetes and Asthma Services Management - Get people screened and referred to health services, expand care and self-management education in a culturally and linguistically appropriate manner, and collaborate with other organizations to increase awareness about the impact of pollution while advancing school policies that support children with asthma.

Examples of How We Invest in Improving Health

Helping valley residents stay active improves the overall health of the community. Kaiser Permanente partnered with KaBOOM! and providing \$500,000 and volunteers to create kid-designed, community built playgrounds in three central valley communities. These playgrounds increase access to safe physical activity for high-need areas.

In addition, The City of Clovis received \$40,000 to provide five exercise stations along the 4.6 mile Clovis Old Town Trail. "I absolutely love this trail, and we're here today to recognize and say thank you to Kaiser Permanente," Clovis Mayor Nathan Magsig said. "Kaiser Permanente recognizes the value of the people here and the value of their health and they're very much committed to this community."
